

- How long as a developer on the project?
- Do you have experience or know the rebase command? When using it, did you deal with any conflicts?
- Do you have experience or know the squash command? When using it, did you deal with any conflicts?
- Do you have experience or know the cherry-pick command? When using it, did you deal with any conflicts?
- Do you use stash-apply? In what situations did you use this command?
- Do many integration conflicts happen during development?
- Are these conflicts resolved locally in your repository before integrating the code with the main repository?
- In your opinion, which command usually results in code integration conflicts?
- In your project, is there a standard adopted by all members? Or is it a personal choice to use git commands?
- Ever had to deal with conflicts resulting from the merge? How did you solve them?
- How do you usually resolve merge conflicts?
- Do you often consult with the team to resolve merge conflicts?
- Is there any standard for the workflow?
